AB Inflatables®, a division of AB Marine Group, is world renowned as the premier designer and manufacturer of inflatable boats for both the leisure and professional markets. AB Inflatables® has a long established reputation for innovative design, superior construction, and outstanding customer satisfaction.

Our boats have earned their status as the world's finest inflatables. AB is one of only a few RIB manufacturers to have CE, NMMA as well as ISO 9001 certification. At AB, we insist on an unwavering attention to detail. We travel the world to procure the finest materials available. We painstakingly hand-craft each boat, to ensure that even the smallest details are considered. The result is a full line of inflatable boats, designed and built to provide our customers with the exceptional quality they deserve, and have come to expect from AB.

We are committed to meeting the ever changing needs of our customers. It is this commitment that drives our desire for constant innovation. AB Inflatables® has never shied away from the hard work of refining our existing models, designing new inflatables, or retooling our workshop to ensure that AB boats are truly the most celebrated watercraft on the market. This un-equalled pursuit of perfection has long distinguished AB from the competition.

With five decades of proven expertise, AB Inflatables® has earned its reputation for excellence. Our unparalleled craftsmanship, relentless innovation, and commitment to customer service have made the entire AB line the most prestigious and sought after inflatables on the market. Contact one of our dealers today to discover for yourself why AB Inflatables® are the choice of discriminating boaters worldwide.

craftsmanship

LEISURE

Why AB?

There are countless reasons for choosing an AB Inflatable as your tender, but there are just as many reasons for choosing an AB Inflatable as your primary boat.

Experience

Born in 1969, AB Inflatables have over 50 years of non-stop production. Today, we are proud to say that our products have touched almost every corner of the globe and have earned the trust of thousands of customers.

us to improve our production procedures along the different stages. This quality-control system, which is just one way in which we fulfill our promise to continuous learning, has enabled us to make significant improvements to our boats throughout our more than 50 years in business.

Design

Our superior rigid inflatable boats (RIBs), manufactured with the highest quality materials and attention to detail, are recognized and admired worldwide. Designed for recreational use, commercial operations and jet segments, they are available in over than 80 models.

Innovation and Craftsmanship

As part of our unshakable dedication to produce superior inflatable boats, we handcraft 100% of our boats in house, including hull, tubes, rigging and inboard engine installations. Our devotion to each boat ensures that even the smallest details are handled with care. The result is a full line of inflatable boats designed and built to please our customers with the exceptional quality they have come to expect from AB.

Every AB model has a unique forward hull design that creates a raised bow and enhances performance by enabling easier planning with less horsepower. This allows the boat to cut through wakes and chop, virtually eliminating spray. The result is a smoother, more stable, and drier ride than any other inflatable boat on the market.

Sales & Service Network

Our vast network of representatives worldwide provides quick responses with a personal touch. We select companies known for their technical expertise, commitment to quality work and superior customer service. Customers will be backed up around the world with a high sense of collaboration through our network partners.

Quality

Audits

Our commitment to delivering the highest quality products to our customers extends to submitting all our manufacturing processes to rigorous evaluations by third-party auditors. This means building under the strict surveillance of our quality certifications-NMMA for the USA, CE for Europe and ISO 9001 quality standards.

Portfolio

AB Inflatables offers the widest portfolio in the RIB (Rigid Inflatable Boat) industry worldwide. Our portfolio includes open aluminum and console RIBs, open Fiberglass and console RIBs (ranging from 7.5ft / 2.39m up to 28ft / 8.33m), as well as a fast-growing jet tender line. Each boat is manufactured from beginning to end in our factory, including tubes, hulls, and electrical installations.

Traceability

We offer the peace of mind that comes with creating each boat with a unique history report, documenting when it was made, and what materials were used in the process. These records have proven valuable to

Every AB distributor counts on more than 80 different models to offer, along with the option of having each boat completely customized. This allows prospects to play with tubes, upholstery and gelcoat colors, as well as with seating, consoles, and layouts on our aluminum and fiberglass segment.

Materials

We build each AB rigid inflatable boat with exceptional standards using only the finest materials. We travel the world to procure superior components, working with the most reliable and respected suppliers in the marine industry. The result is an inflatable boat of unmatched craftsmanship and quality equal to that found on the most prestigious yachts.

All of our console models feature steering and control systems provided by SeaStar Solutions®, the marine industry's leading manufacturer of such products.

Our RDS fuel tanks are NMMA certified ISO 9001 and ISO 10088. This company has over 50 years building quality aluminum products and their tanks are built in accordance with ABYC & NMMA regulations.

Non-skid decks on our rigid inflatable boats are manufactured by SeaDek. These decks are made from soft, durable, UV resistant EVA material specifically designed for the marine environment.

Quality components from Attwood, with the expertise that comes from more than 120 years in the marine industry, ensure reliability and safety in each of our inflatable boats.

Our boat's components come from ABYC member Pacer Group, which has more than 40 years of experience providing materials for the most prestigious yacht brands.

We are supplied by industry leader Blue Sea Systems who meet ABYC, NMMA and are ISO 9001 certified.

Our tubes feature ORCA engineered fabrics, manufactured by Pennel & Flipo. They deliver industry-leading weather, chemical and abrasion resistance, and are ISO 9001 BV Certified (ISO 6185, ISO 15372). **Even the smaller AB tenders are made with 820 Orca® CSM Fabric which results in extra protection and, with it, greater resistance and durability. No lower grade than 820 Orca® CSM Fabric is used on any AB Inflatable boat.**

Dedication to quality in our boats extends to stainless steel bow and stern eyes from EPCO, a trusted NMMA member company that is ISO 9001 registered.

LED navigation and anchor lights on our inflatable boats are manufactured by Perko, an ABYC charter member whose products are USCG and ISO 9001 certified.

Each of our aluminum inflatable boats feature Axalta coatings (previously known as DuPont Performance Coatings). An industry mainstay for more than 150 years and with customers in more than 130 countries. The company holds ISO 9001/ISO TS 16949 certifications.

Our dinghy chaps and covers are made with Sunbrella, the most advanced fabric on the market - breathable, water- and UV-resistant, and eco-friendly.

Safety

Product safety is of the utmost importance for any boat builder. That is why we partner with the marine industry's most trusted and respected suppliers, ensuring only high-quality components go into every AB boat. We further carry out our commitment to safety by continuously auditing our processes to ensure compliance with all certification requirements.

Tube Tests

Several tests are applied to each and every one of the baffles on our tubes in order to guarantee the highest quality seams. As a first test, baffles of the same tube are deflated between inflated baffles to check if the air is passing from one to the other. A second test applies liquids on the surface of the tube in order to identify leaks to the outside. As a third and final inspection, each baffle is pressure tested to guarantee the same performance 24 hours after the initial measure. This procedure provides our quality tube manufacturing process a high percentage of consistency. All our tubes are 100% built in house with Orca® CSM Fabric from Pennel & Flippo.

Electrical and Fuel Systems

AB's electrical and fuel systems are designed to the standards of the American Boat & Yacht Council (ABYC), the marine industry's premier global standards organization and a leader in technical education and technician certification.

NMMA Certified Fuel Tanks

All AB console models use fuel tanks that are pressure-tested in accordance with ABYC standards, NMMA regulations, and meet ISO 10088 specifications.

Environment

Chrome-Free Advanced Technology Pretreatment

All of our aluminum inflatable boats are built using a cutting-edge, powder-coating pretreatment process that is chrome-free. This new eco-friendly technology maximizes corrosion protection and ensures superior coating adherence to the aluminum hull.

Emissions

Our commitment to caring for our planet extends to building our inflatable boats with NMMA certified fuel systems. They are designed, based on country-specific regulations, to minimize evaporative emissions.

Aluminum RIBs

Our aluminum hull RIBs are lightweight, enabling the use of lower-horsepower engines without sacrificing performance. This ultimately means less fuel is being used, resulting in lower emissions. Aluminum is also a highly recyclable material, allowing us to sustainably avoid using up natural resources and unnecessary energy during the production process of this material.

ABJET®

Above & beyond
the standard

ABJET 390 XP

- Innovation, performance, comfort and style.
- Powered by BRP Rotax® Engine (OEM).
- 100% Built in house: including inflatable tubes, hull and deck, electrical and rigging installations.
- Innovative design which maximizes weight distribution.
- Optimized overall person capacity with two people at pilot seat.
- Ergonomic Side Mounted Throttle for better maneuverability and control.
- Flat floors on deck free of obstacles and convenient swim platform.
- International Service Coverage and Warranty.

ABJET® JET TENDERS

The definition of innovation, performance, comfort and style.

Our ABJET® line seamlessly marries performance with luxurious style, providing comfort, safety and the unparalleled quality craftsmanship that AB Inflatables® is known for.

The unique and meticulously designed deck maximizes space while optimizing boat stability and promoting better weight distribution. The ABJET® deck is made from a single unit of fiberglass, meaning no added or moving parts, quiet navigation, easier maintenance and increased longevity.

The ABJET® is designed to comfortably seat two people at the pilot's seat on the smaller models offering the best person capacity in the segment. With a flat floor deck free of obstacles, an ergonomically positioned throttle a sport console with cupholders, a convenient platform with a stainless-steel sliding ladder, stainless-steel handles, rails and other features of the highest quality, our ABJET® Portfolio guarantees a seamless experience on the water.

Powered by BRP-Rotax® (OEM), the ABJET® guarantees peace of mind. In addition, owners are fully backed-up by a dedicated aftersales and engineering ABJET® team and an international service network.

OCEANUS | VST FIBERGLASS CONSOLE TENDERS

The definition of versatility, comfort and performance.

Ready to serve as the perfect tender or as a primary boat, our Oceanus fiberglass sport console RIB delivers unsurpassed performance, convenience, and capacity.

Experienced mariners will instantly spot what sets the Oceanus apart: a wide array of standard and optional features create a sporty and dynamic RIB ready for anything. The generous space aboard the Oceanus range of RIBs is a result of our unique forward-hull design. This stylish yet functional layout provides a comfortable ride, with ample storage for gear or the day's provisions. Built with an extra-deep V-hull, the Oceanus cuts through chop while keeping passengers dry.

Nine models available between 12 to 28 feet.

MARES | VSX LIGHTWEIGHT FIBERGLASS CONSOLE TENDERS

Our most compact, practical and comfortable sport console tender.

Whether you are looking to explore the local waters, secluded fishing spots, or just looking for a fun night out on the town, our Mares console tender is the way to go. It offers comfortable and convenient seating positions for a relaxing boating day.

Our Mares tender features a durable fiberglass hull designed for extra stability and superior handling and in addition, its deck is made from a single molded-in fiberglass deck for quiet navigation and greater durability. It guarantees a smooth, dry ride, and though lightweight, its durable construction ensures years of dependable service.

Tailored with a comfortable cushioned seating area, console with cupholder, a roomy non-skid deck and a long list of standard features, the Mares is the ideal tender for family fun. It also includes an abundance of storage, offering a flip open rear seat and concealed bow locker. With four lifting points, it is also conveniently easy to haul on to davits or decks.

Three models are available in 10, 11 and 12ft.

NAVIGO | VS OPEN FIBERGLASS TENDERS

The most spacious fiberglass RIB on the market, easily customizable to fit your every need.

With its unique forward-hull design, our full-featured Navigo is the most spacious fiberglass RIB on the market. Ready for whatever comes its way, this is the ideal tender for a day trip to the beach, an adventurous morning of snorkeling, or simply transporting family and friends in style.

The modular design of the Navigo allows for easy customization. From seating choices including bench seats, consoles and even two-person jockey seats, this boat can be personalized to fit your unique needs and style. With its incredibly durable and dependable double fiberglass hull, everything about the Navigo speaks to convenience and practicality.

On our smaller models, which are very popular among charter companies, portable fuel tanks can be fitted in the bow lockers with the fuel line hidden, leaving the deck free of obstructions. As well, built in fuel tanks can be installed in our larger models. With four davit lifting points, an elegant, non-skid diamond patterned floor and a large bow locker, the Navigo is one of our must-have RIBs. Last but not least, even the smaller models from 8-10ft offer an 820 CSM Orca® Coated Fabric which brings extra protection and with it greater resistance and durability.

Nine models available between 8 to 19 feet.

VENTUS | VL LIGHTWEIGHT FIBERGLASS TENDERS

Lightweight, full-length fiberglass deep-V RIB, designed for extra space, durability and performance.

Here at AB, we created the Ventus as the perfect lightweight fiberglass performance tender. Due to its unique design, the Ventus requires very little horsepower, without sacrificing maneuverability.

Whether you are cruising back to the marina for lunch or hosting a fishing trip, the Ventus packs a variety of features into one small, light package. Designed with a deeper freeboard, the Ventus is equipped with a spacious interior ensuring an enjoyable, stable and dry ride. Our larger sizes offer seating for up to six adults, while our smaller models seats 4 adults. With an 820 CSM Orca® Coated Fabric on models from 8-10ft, it brings extra protection and with-it greater resistance and durability. Its integrated non-skid deck material also allows for extra safety and confidence on the water.

Keeping up with our standards of safety, we designed the Ventus with an additional air chamber built into the hull. Designed to be easily hauled onto a deck or davits, it can also be pulled up on a sandy beach for shore excursions with ease.

Four models available from 8 to 12 feet.

ALUMINA | ALX ALUMINUM CONSOLE TENDERS

Versatile, durable, and designed for the adventurous.

Designed with the aquatic adventurer in mind, the Alumina sport console RIB is the most complete aluminum console boat on the market. Its high-quality aluminum hulls make it durable enough to withstand all sorts of terrain, allowing you to confidently make your way through coral reefs, rivers and lakes in style and comfort.

Despite its strength and durability, the Alumina sport console line is also lightweight. This means easier launching and lifting onto davits, platforms, or simply up to the beach for a day of relaxing. This also means greater speed, less required horsepower and improved fuel economy.

Thoughtfully designed to be a multipurpose boat, the Alumina offers both ample storage compartments and a spacious deck layout. Features include a standard steering system, bilge pump, bow locker, fitted portable fuel tank, LED navigation lights, all around lights and cleats. In addition to that, all the electrical and rigging installations are done in-house.

Our chrome-free Pretreatment and Powder Coating Technology offers a superior coating adherence. The Alumina also can be requested uncoated, which means less maintenance when it is frequently used on areas with underwater obstructions. These include lifting and towing eyes vertically positioned to avoid these from bending, reinforced transom knees and a large squared aluminum engine rest support.

Nine models available from 9.5 to 18 feet.

LAMMINA | AL ALUMINUM TENDERS

World-renowned, innovative design created to fit your needs.

This light-weight, hard-bottomed open tender is perfect for boats with lighter capacity davits. Featuring a tough aluminum hull for weight reduction and durability, this solidly constructed hull provides years of reliable use.

The Lammina AL easily cuts through wakes and chop with a lower horsepower than fiberglass tenders. A full-length rubber keel protector enables you to cruise through unknown areas without worry, and its double layer floor guarantee a dry deck and a stable ride. The bow locker serves as a convenient boarding step and comfortable seat for guests. You can also use it to store a portable fuel tank where the fuel line passes underneath the floor, leaving the deck free of obstructions. As an important key feature, the models from 8 to 10ft come with an 820 CSM Orca® Coated Fabric, it offers the thickest and strongest fabric in their segment which brings extra protection. The versatile full-sized Lammina AL has a modular design with customizable seating and console choices.

Our chrome-free Pretreatment and Powder Coating Technology offers a superior coating adherence. The Lammina AL line also can be requested uncoated. These include lifting and towing eyes vertically positioned to avoid these from bending and reinforced transom knees.

Ten models available from 8 to 16 feet.

LAMMINA | UL ULTRA LIGHT ALUMINUM TENDERS

Extremely light in weight, small but powerful, designed to deliver performance in style.

Built with the same quality standards as our larger, luxury models, the Lammina UL is our most sophisticated lightweight tender yet.

Created to deliver performance on the water, its open design also creates an interior that is ideal for safely transporting cargo and crew. Ideal for the cruising couple, this tender feature an ultra-lightweight aluminum hull and a stronger CSM Coated Fabric in 820 D-tex which means a higher level of resistance. Its smaller size is perfect for weaving through crowded moorings and exploring shallow bays. When the day's adventure is over, the Lammina UL's davit lifting points make for easier deck storage.

Although the tender is uncoated for minimal maintenance, you can choose to add a Chrome-free Pretreatment and Powder Coating. The UL line hulls are manufactured with key reinforcement points. These include lifting and towing eyes vertically positioned to avoid these from bending and reinforced transom knees.

Four models available from 7.5-10 feet.

ABJET 430 XP

AB RIDER

PERSONS & LOAD CAPACITIES WILL VARY WHEN BOAT IS RIGGED WITH NON-STANDARD ACCESSORIES. THE MAXIMUM PAYLOAD & PERSON CAPACITY HAS BEEN CALCULATED ACCORDING TO ISO & ABYC STANDARDS. OPERATING AT OR NEAR MAXIMUM CAPACITIES IS ONLY ADVISED IN CALM WATER AND AT REDUCED SPEEDS. ALL DIMENSIONS IN ACCORDANCE WITH ISO 6186 AND ISO 8666. APPROXIMATE WEIGHT HAS A TOLERANCE OF +/- 5% AND INCLUDES ALL STANDARD ACCESSORIES EXCEPT ON MODELS VS.L & AL WHICH IS FOR BARE BOAT ONLY. ADD APPROXIMATE 45LBS TO CONSOLE BOATS FOR ACCESSORIES LIKE: BATTERY, FUEL/WATER FILTER, BILGE PUMP, STEERING SYSTEM & FIRE EXTINGUISHER. ALL DIMENSIONS ARE +/- OR +/- 3%. SOME MODELS SHOWN MAY FEATURE NON-STANDARD EQUIPMENT. SEE STANDARD AND OPTIONAL EQUIPMENT LISTINGS FOR FULL DETAILS.

THE PHOTOGRAPHS IN THIS BROCHURE WERE TAKEN UNDER CONTROLLED CONDITIONS, USING PROFESSIONAL OPERATORS. YOU SHOULD NEVER ATTEMPT ANY SPEEDS OR MANEUVERS WHICH ARE BEYOND YOUR CAPABILITIES, NOR WHICH ARE POTENTIALLY HAZARDOUS. WE STRONGLY SUGGEST USING RECOMMENDED HP'S ON THE BOAT. YOU SHOULD CONSULT YOUR LOCAL DEALER REGARDING SAFETY AND WEIGHT ISSUES BEFORE PUTTING MAXIMUM HP'S ON YOUR BOAT. SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE, ALTHOUGH ALL DETAILS SHOWN ARE ACCURATE AT THE TIME OF GOING TO PRESS. FOLLOWING A PROGRAM OF CONTINUOUS IMPROVEMENT, AB RESERVES THE RIGHT TO DELETE OR MODIFY ANY OF THE PRODUCTS IN THIS BROCHURE WITHOUT NOTICE.
